BEST WEEK OF THE YEAR

LOCAL TRADE IN ALL LINES BEYOND ALL EXPECTATIONS.

Grocers and Dry Goods Dealers Especially Busy-Grain Market Furnishes the Only Bad Spot.

Trade in the week ended on Aug. 24 was a gratifying surprise, and in volume probably the largest of any week of the present amount of fruits and vegetables offered demonstrated that there had been unnecessary alarm as to the shortage of crops. This is especially true of fruits, as peaches, pears and plums sold as low as in any former year, and apples of excellent quality are selling at the average price in August of years past. In the vegetable line Irish potatoes are still unusually high, but shipments from the Northwest in the near future will bring down that market. Sweet potatoes, cabbage and onions are selling as low as usual in August, and tomatoes, which a few days ago were selling at higher prices than in any former year, and some as low as 25 cents a bushel Weaker conditions of wheat have caused an unsteady feeling in the flour market. Sugars carry an easy tone, with demand much better the last week. Coffees are in much the same position as in some weeks weakened the canned goods market. While there will be higher prices undoubtedly than there would have been, it is likely to keep quotations on the pack of that vegetable at least at a lower-level, and the same remark will apply to peaches. With each day the poultry market shows an improvement as to demand and as to condition of the receipts, chickens being larger and better fattened. Eggs are firm at the advance on Friday. Provisions are mov-ing well at steady prices. The dry goods houses had a good week. Business and 1.85.

prices rule much the same as for some weeks past. The seed market is more active, with prices firm. The local grain market was a disappointing one as to receipts, the break in prices on wheat and corn not apparently increasing shipments until late in the week. On markets it is thought that prices reached the climax early in August, and that the declines which have now set in are to be followed by further shrinkage in values. The week closed with track bids ruling as follows, as reported by the secretary of the Board of Trade: Wheat-No 2 red, 68%c track; No. 2 red, 68% on milling freight; No. 3 red, 6414@6614c track. WALL-STREET SITUATION

THE WEEK HAS BEEN DULL, BUT THE OUTLOOK IS GOOD.

Generally Prosperous Conditions Conducive to a Strong Market-Available Supplies of Cash.

NEW YORK, Aug. 24.-The customary tendency to take profits at the close of a week of rising prices was offset to-day by the buying attracted by the highly favorable character of the weekly review of agencies and by the settlement of the Franco-Turkish trouble. The London market was closed for a holiday to-day, so that the demand for American securities included by the latter development came directly on the New York market. There was some profit-taking before the appearance of the bank statement and again in the final dealing, but the professionals found little difficulty in supporting prices, pure, 30@33c: indigo, 65@80c; licorice, Calab., genuine, 35@40c; magnesia, carb., 2-oz., 20@22c; morphine, P. & W., per oz. \$2.25@2.50; madder, 14@16c; oil, castor, per gal, \$1.15@1.25; oil, bergamot, per lb, \$3; opium, \$3.75@3.96; quinine, P. & W., per oz., 37@42c; balsam copaiba, 55@60c; soap, castile, Fr., 13@16c; soda, bicarb., 2½@6c; salts, Epsom, 1½@4c, sulphur flour, 2½@5c; saltpeter, 10@14c; turpentine, 40@30c; glycerne, 17@20c; iodide potassium, \$2.45@2.50; bromide potassium, 55@60c; chlorate potash, 15@20c; borax, 9@12c; cinchonida, 40@45c; carbolic acid, 37@47c; cocaine, mur., \$6.55@6.75. and held the market pretty steady and near the top until the close. The public still holds back, but evidently the hope is entertained that Monday morning will bring more outsiders into the market, attracted by yesterday's greater activity and strength and its persistence to-day. The bank statement was about as expected in the cash item, except that the special shipments to Philadelphia were not disclosed. There were, however, the usual operations by the always industrious room traders to try to reap advantage from requirements by shorts by bidding up stocks and even to inaugurate bull movements by the formation of pools in special stocks. In a few cases operations were of sufficient consequence to give color to the supposition that larger financial plans were being worked out or that coming deviopments warranted expectations of large returns of stocks, but all these were insufficient at any time to give great animation to the market. The covering by shorts was largely attributed to Western sources, from which selling had been largely on the early indications of damage to the corn crop. The sustained character of the demand indicated that the crop damage had been overdiscounted by the selling of stocks and possibly overestimated also. The continued high level of railroad earnings in the regions affected had an effect on the holders of securities, extra fine granulated, 5.67c; granulated (5-lb) the price of corn seeming to have advanced to a figure sufficiently attractive to bring out large offerings from reserves in farmers' hands. Finally, the crop condition of the spring wheat crop and the large total crop of wheat indicated have received increasing attention. Last week's record exports of wheat, although not fully maintained this week, adds to the importance of our wheat crop and reinforces the statistics of foreign wheat crops as showing large requirements to be met from out surplus sup-

> The conditions thus presented are a forcible reminder of the outcome of last year's marketing of crops. The development of a shortage of spring wheat last year, which caused a weakness in the securities of all the railroads in the Northwestern region, proved to be neutralized by the very heavy traffic in general merchandise, so that railroad earnings were not checked in the increase. The exceptional profit enjoyed last year by the Southwestern winter wheat, corn and cotton regions are believed to insure them against excessive business depression from this year's corn shortage. The steel strike cloud still overhangs the market, and trade authorities point out considerable effect on the market for products already. The diminished production of iron has resulted in a weakening in that market, while delayed deliveries of some lines of finished product, caused by the closing of mills, is beginning to interrupt

> projects under way. Operators in stocks are inclined to continue their analogy with last year's events and point to the ultimate improvement in the anthracite trade, in spite of the shutdown of the mines. This sentiment may be the effect rather than the cause of the firmness of the United States Steel stocks, in which the dealings have been small and insignificant. The real pressure on the stocks came in anticipation of the strike and forced the drastic liquidation early in July, when forehanded financiers were preparing for what they saw was the inevitable. The feeling in financial circles is thus seen to be one of confidence in the ultimate values of securities and continued prosperous conditions. Speculation halts because of a doubt of the capacity of the money market in the immediate future to supply the sinews of war for operations on a sufficient scale to

attract a large outside share in a specu-lative movement. Money on call rules easy at the moment, but there is no inducement to make large commitments in stocks in reliance on call loans. Already he interior is withdrawing funds from New York for the annual crop movement, thus belying the superficial view that the regular resources of interior banks this year could relieve New York banks of this drain. This almost perennial expectation is due to misconception of the nature of this interior demand. The payments to the field laborers and to small farmers necessitates the use of actual currency, the disuse of checks making impossible the economy of the circulating medium which results from clearing-house operations with checks between banks. But this currency must be drawn from the cash reserves of the banks, thus contracting proportionately their credit resources, based on cash reserves. The permission under the banking laws to interior banks to count as part of their legal reserves cash resources which are actually on deposit with New York banks has the effect of converging the annual demand for currency almost directly upon the cash reserves of the New York clearing-house banks. The prospects are that the demand will be heavier than usual

this fall. The railroad bond market has been nar-row and dull, but firm. United States bonds were unchanged on the call price of last week. Following are Saturday's share sales and the recorded fluctuations in prices:

Tone at the Close. r & Kiser's Telegram.] Aug. 24.-The market had a e opening. Trading was genut the list. The Gould stocks ial strength. Brokers usually at interest had buying orders cific. Further talk is heard of proposed combinations of interests in the Southwest, coupled with stories of a division of the Wabash system between Missouri Pacific and Pennsylvania. Baltimore & Ohio maintained the strength it has enjoyed for the past few days. Prominent Western speculators are quoted as increasing their holdings of this security. Stories of additional issue of stock to pay for acquisition of new companies, thereby giving stockholders rights, induced some buying of stock. St. Paul, Union Pacific and Southern Pacific were easily the leaders in road stocks. Bullish sentiment in them shows no signs of abatement, despite the talk of no dividend in Southern Pacific and the uncertainty of increased dividend on St. Paul. The steel strike situation shows improvement so far as the company talk of no dividend in Southern Pacific and the uncertainty of increased dividend shows improvement so far as the company is concerned. The course of these stocks | Prime timothy seed, \$5.55. Mess pork, per bri to-day indicated this, but the character of \$14.35@14.40. Lard, per 100 lbs. \$8.92 4 8 85. The bank statement was looked upon as a favorable statement. and traders who have been long of stocks increased their holdings. The market became stronger immediately after the bank statement was issued, and there were no signs of any prominent liquidation. Money still remains easy.

DULL TRADE IN CEREALS

WHEAT AND PROVISIONS HAVE MADE MINIATURE GAINS.

Corn Is a Shade Down and Oats Lose a Quarter Cent-Good Clearances of Wheat Reported.

CHICAGO, Aug. 24.-The leading speculative markets were dull and featureless, but fairly steady, to-day. September wheat closed a shade up and corn at an equal decline. Oats closed 4c lower and provisions unchanged to 21/465c improved.

Traffic in wheat was in small quantities, and as the situation showed no material change the usual dull and featureless affair known as the "Saturday market" was the early on the weakness of the foreign list. A recovery to 70% followed on profit taking by shorts. Prices fluctuated the rest of the session within the range thus established and closed steady, September a shade higher at 70%c. Exporters reported 12 loads taken. Seaboard clearances were 572,000 bu and primary receipts aggregated 1,097,000 bu, compared with 1,119,000 bu last year. Silver bars steady at 26%d an | Local receipts were 150 cars, 11 of contract grade. Minneapolis and Duluth reported 592 cars, a total for the three points of 742 cars, against 480 cars last week and 807 cars

Corn gave indications of having shaken out all dcubters and insufficiently fortified supporters during the past two weeks' decline. The market opened weak, but gradually improved when offerings of long corn were observed to be comparatively small, and some of the heavier bull traders, who starting again to accumulate new loads of long corn. There was a fair inquiry for Eastern shipment, and 350,000 bu were reported sold. Receipts were 282 cars. September sold between 5514c and 54%c, and closed a shade down at 55c Continued liquidation by September longs

caused a further decline in oats early in the session, but the selling pressure did not last long, and the market eventually became steady in sympathy with corn. recovery in prices, however, was not material. September sold between 34\%@34\%c and 33\%c, and closed \%c lower at 34c. The\$1,454,171 | cash situation was slow. Receipts were 224

Provisions were dull but firm, and made a slight improvement without the aid of the grain markets. This was due to buying for the outside account. The price range was narrow. January pork closed 24/45c higher, lard 24/2 up and ribs unchanged at \$15.55, \$8.824/2 and \$7.974. respectively. FALL RIVER, Aug. 24.—Print cloth prices were marked up another sixteenth to-day, and the asking price is now 2%c for regulars and the old prices for olds. The manufacturers are parting with but small lots, and it is evident they are simply testing the strength of the buying movement with a view to ascertaining just how imperative the needs of buyers are, and what figure they may finally be able to obtain for the goods made here. NEW YORK, Aug. 24.-The print cloth market continues very strong. Narrow goods sold on the basis of 25c for regulars. Wide goods six-teenth higher. Tone of staple cottons generally steady. Prints and ginghams unalloyed. Market for cotton yarns shows no improvement, business dull and prices irregular, with lower sales than a week ago. Worsted yarns firm. Woolen, juto
